

*'providing an active contribution to enhancing nursing care
for patients with pain'*

V&VN Pijnverpleegkundigen

Mission & Vision

V&VN Pain nurses provides an active contribution to enhancing nursing care for patients with pain.

By means of their activities, V&VN Pain nurses contributes to optimal pain-relieving treatment in patient care. The development and anchorage of the pain nurse as a core discipline within the healthcare system is essential. To achieve this, the development of nurse-based scientific research and continuous attention to the quality of care is important. Therefore providing education is essential.

For you

Membership offers the following advantages:

- Access to specialist knowledge in the field
- Active participation and taking part in discussions through the special interest groups
- Enlarging your network by coming into contact with fellow pain nurses
- A discount on access to the Congress organised every other year
- Being the first to know about developments in the field through the newsletter

Our ambitions

- To be acknowledged and recognised as one of the leading parties within the care of pain treatment
- To enhance the expertise of our members
- To optimize nursing care by developing quality criteria
- To offer a network in which members can share information with each other
